

**FOR IMMEDIATE RELEASE**

**Update on Fiber to the Home Project**

TCT would like to let our customers know that the Fiber to the Home upgrade is progressing on schedule. Fiber Optic technologies will improve both the telephone and digital services of TCT customers. Faster internet speeds, superior digital television and enhanced telephone communications are all a result of upgrading services to Fiber Optics.

Some customers have asked “Why upgrade to Fiber?” The answer is simple. It is the mission of Tri-County Telephone Association, Inc. to provide our customers with the most advanced technology available. TCT is pleased that we are able to offer the same service that larger companies like AT& T, Verizon and Embarq offer to their customers. TCT can also proudly say that we are able to offer this cutting edge technology to our customers in rural areas as well, that is something that the larger companies are not willing to do.

Please keep in mind that the Fiber to the Home is not just for your phone line. As mentioned, other services such as high speed internet and digital television will also benefit from the upgrade. That means you can connect to your friends, neighbors and family faster! To learn more about the TCT Fiber to the Home Project, please visit our website [tctelco.net](http://tctelco.net) and click on the “What is FTTH” questions and answers link.
